

NYC Dynamics

NYC Dynamics is a U.S. based small business delivering secure software engineering, AI integration, cloud modernization, and operational resilience for federal, state, and local government agencies.

Core Capabilities

- Secure Software Engineering
- AI Integration and Automation
- Cloud Architecture and Modernization
- DevOps and Infrastructure Automation
- Secure API Integration
- Operational Resilience and Observability
- Web Application Development using React, WordPress, and Django

Representative Experience

High Availability Public Service Platform. Led modernization of a public facing crisis services platform operating in a regulated environment. Delivered improvements across cloud infrastructure, deployment automation, monitoring, and operational reliability.

Secure Integration and API Program. Directed secure integrations across distributed systems including authentication, access control, logging, and API orchestration for compliance focused environments.
